

USING PI

ODER HALT CLAUDE CODE...

aber pi ist besser ;)

“Die einen rennen in
die eine Richtung,
die anderen in die
andere Richtung.
Am Ende treffen
wir uns wieder alle
irgendwo.”

– Mario Zechner

LOCAL PI EXTENSION

🕒 10

Create a minimal project-local Pi extension. It should register a slash command `/hello`. When I run `/hello NAME`, it should show a notification saying: "Hello, NAME! This came from your Pi extension."

BLOCK FILE ACCESS

🕒 15 MIN

Create a project-local pi extension. It should block write or edit tool calls to these files: `.env` and `AGENTS.md` When blocked, explain that the file is protected by the workshop extension. Keep it simple.
